Dear Mr. Richard:

□I am here to thank you for you and your program . Thanks for your endeavor and care to me this year.

Before I came to America, I could hardly imagine how I can live there. But things were seems so smooth after I reached PA. I did not even have any problems in schoolor living. I got deeply cared by PEACE organization, for I have a representative called Mike Flower. We at least would contact once each month. Any problems I got in life, he is the man that I could talk to. Not only did I live well under arrangement of PEACE organization, but also I had fun in this big group. The memory of Washington trip would never fade away in my mind. I never had such fun in America with so many children. Besides, this is a unique feature that other exchange student programs do not have.

Through this program , I actually acquired American culture and background. With such a steady and comfortable situation, I pursued and conquered another top in my education—being accepted by Purdue University—a well-known university nationalwidely. I am going to study in Industrial Management and Engineering, which ranked 2rd in this field. Also, I have been offered admissions by other 5 universities, some of them even gave me really tempting scholarships.

Again, thanks this grogram gave me such a good opportunity to enjoy and improve my life
